Springville, NY-

Effective immediately, the original manufacturer and leader in turbine debris blowers, Buffalo Turbine, is pleased to announce it has signed on G.C. Duke as the new primary dealer for Ontario and Quebec. G.C. Duke is a well-known and respected company throughout their territory and in the golf and turf industry.

Buffalo Turbine has been manufacturing turbine style blowers and sprayers since 1945, which are made, using high-precision machined components resulting in long-lasting dependable products. These turbine units are being used worldwide in a variety of applications. The diverse product line provides its customers with the ability to choose a product that best suits their application and various budgets. Popular applications include golf/turf, paving contractors, solar farms, poultry barns, airports, racetracks and many more.

Buffalo Turbine offers debris blowers ranging from gas and diesel engine tow-behind units to PTO/hydraulic units and more. G.C. Duke will carry the entire line Buffalo Turbine product line. As Buffalo Turbine continues to grow, its product focus has also expanded into several other industries. G.C. Duke will be working directly with Buffalo Turbine in an effort to continue to expand in these markets.

Throughout its 60 plus years in business, G.C. Duke has always remained committed to the ideal of providing its customers with top quality equipment supported by outstanding after-sales parts and service support.

Contact Buffalo Turbine at 716-592-2700 or G.C. Duke at 800-883-0761 for more information.
