Buffalo Turbine Showcases an Unprecedented Six New Models at Equip Exposition.

SPRINGVILLE, N.Y. [October 17, 2004] – Buffalo Turbine impacts the Equip Exposition in Louisville, Kentucky by showcasing breakthrough innovations to the turbine debris blower market. Six groundbreaking models have been introduced to date this year, giving professional grounds crews and landscapers more options and flexibility than ever.

“Buffalo Turbine’s core business is turbine debris blowers,” says Sales Manager, Guy Gabbey. “Designed and manufactured. We lead and revolutionize the industry because it’s been our focus since 1945.” Select model highlights featured at the show include:

Buffalo Turbine Cyclone eKB

The new *Buffalo Turbine Cyclone eKB* is the world’s first electric-powered turbine debris blower. It’s ideal for residential and commercial locations where the benefits of re-chargeable electric and quieter equipment are preferred. Equipped with a rugged, heavy duty frame for long lasting durability.

Buffalo Turbine Cyclone 8000 EFI

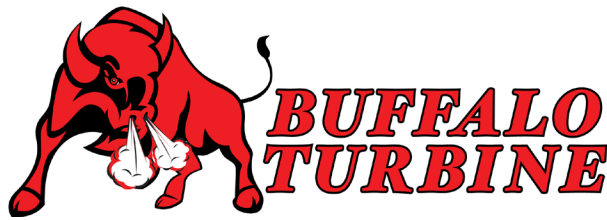

The new entry-level *Cyclone 8000 EFI* is ideal for homeowners and residential landscapers tackling light duty debris removal tasks with efficient, time saving ease. It provides the reliability of a 14hp gas engine with electronic fuel injection and the operator conveniences of more powerful Buffalo Turbine models. Enjoy less setup time with remote start/stop and wireless 360-degree nozzle rotation. Then easily maneuver confined areas with a new, lighter tow behind frame option with three position retractable trailer hitch featuring multiple height adjustments.

Buffalo Turbine Cyclone 8000

Priced for owners who simply require mechanical pull start and corded remote nozzle rotation. The new base *Cyclone 8000* comes equipped with a carbureted 14hp gas engine and same new, lighter tow behind frame as the Cyclone 8000 EFI.

Buffalo Turbine Cyclone PTO MEGA

At only 245lbs, the new *Cyclone PTO MEGA* boasts significant lighter weight for less turf impact over other blower designs on the market. The powerful MEGA designation is earned from its direct drive high

speed gearbox. Only 25hp minimum at the PTO is required to generate Buffalo Turbine's legendary cyclone force air output.

Buffalo Turbine Cyclone KB7

Buffalo Turbine's industry leading standard, refined. The new *Cyclone KB7* tow-behind frame comes in nearly seven inches shorter and 40 pounds lighter, compared to previous variations, to reduce weight impact on golf courses and landscapes. In addition, further navigate tighter areas and save trailer space by a new three position retractable hitch with adjustable height. Legendary turbine force air performance is powered by a 26.5hp EFI gas engine.

Buffalo Turbine Cyclone MEGA 3

Based upon the popular *Cyclone KB7*, the more powerful *Cyclone MEGA 3* features the same new, weight saving frame and comes equipped with a 40hp EFI gas engine to remove debris further, faster.

Efficiently complete many different debris removal tasks with a Buffalo Turbine debris blower. All models are backed with a 10 year limited warranty. See your local Buffalo Turbine dealer, visit BuffaloTurbine.com, or call (716) 592-2700 for complete line-up and more information on choosing a model for your application.
